# Sustainability efforts

We acknowledge that selling furniture and lighting can never be 100% sustainable, but we want to make an extra effort for the environment. We are dedicated to being sensible frontrunners on environmental responsibility and if we provide timeless, lasting, and functional quality designs, we know nature will prevail, as will UMAGE. We are constantly improving our designs and trying to do even better for the environment, with new sustainable materials, greater functionality and by making our flat-packed products even smaller, to care for you and the planet.

## Reforestation

UMAGE collaborates with the NGO One Tree Planted, so every time a design made from wood is sold, we plant a tree. Trees help clean the air we breathe, filter the water we drink and provide habitat to over 80% of the world's terrestrial biodiversity. Forests provide jobs to over 1.6 billion people, absorb harmful carbon from the atmosphere, and are key ingredients in 25% of all medicines. Fortunately, a mature tree can absorb an average of 22lbs of carbon dioxide per year, making cities a healthier, safer place to live.

In 2023 UMAGE planted 19.259 trees.

## Multifunctional and flexible

Why have a table lamp or a side table and not include a USB or wireless charger as well? Why not make room for storage where the space is vacant anyway? UMAGE not only answers these questions but makes it happen. One of the key aspects of the furniture and lighting designs at UMAGE is multiple functions and flexibility. Designing with more than one function in mind is a sustainable mindset as it reduces the number of products you need to buy to get a complete setting for your space.

## Compact packaging

We have replaced all foam and plastic in our packaging with eco-friendly materials to minimise plastic waste when purchasing an UMAGE design. So, our designs are not only flat-packed to optimise the global logistics and the environmental footprint, but we also make sure that you don't need to throw away tons of packaging material and that the packaging you're left with can be recycled and used for something new.

## Replaceable and recyclable

Creating long-lasting designs is an essential part of the UMAGE brand. To extend the life of the design, most parts of the furniture and lamps at UMAGE are replaceable. If a part breaks or gets worn out, you don't have to go out and replace a complete piece of furniture or lamp – you can simply replace the single parts. When your UMAGE design has lived a full life, it can be separated into key elements for recycling.

## Interchangeable elements

As time changes, the designs can change accordingly. Two years have passed, and suddenly you want another colour on your lounge chair, then simply interchange upholstery in a few minutes. Same thing with our dining chairs, cabinets, and other responsible designs. This means you can add new life to the design and your interior without buying an entirely new furniture piece, saving the world's resources.

## 100% recycled textiles

The Horizons textiles from UMAGE are recycled from plastic waste and reused for a new purpose in the design of comfortable chairs and cute cabinets. The textiles are certified with Global Recycled Standard and STANDARD 100 by OEKO-TEX®. The recycled textile is available for our The Reader, A Conversation Piece, Time Flies, Treasures, Audacious, Curious and Lounge Around collections from UMAGE.

## Hope leather

The tannage of the Hope leather is chrome-free, ensuring a process that benefits both you and the planet. By eliminating harmful chemicals, we not only reduce environmental impact but also offer a safer, more sustainable leather option. Chrome-free leather production means less pollution, cleaner waste streams, and improved biodegradability. The Hope leather is certified with Global Recycled Standard and LEATHER STANDARD by OEKO-TEX®.

## Nordic Swan Ecolabel

The Dunes collection from Sørensen Leather is a part of our permanent leather collection for the UMAGE lounge chairs and ottomans. The Dunes collection is labelled with the Nordic Swan Ecolabel: A highly respected certification verifying that it meets their rigorous requirements regarding the environment, energy use and resources.

## Responsible Down Standard

At UMAGE, we ensure that all goose feathers used for our Eos feather lamp collection are 100% sustainably sourced from farmland to end-consumer. All feathers are licensed with an RDS certification, ensuring the well-being of animals in our production.

# Kvadrat

## Canvas 2 | Fabric from Kvadrat

Canvas is a vibrant woollen upholstery fabric created by Giulio Ridolfo. Particularly well-suited to large surfaces thanks to its pronounced structure, it features a soft weave and an expanded palette inspired by the landscapes of Skagen, Denmark. The melange yarn used to craft Canvas combines three colours, with six hues in every colourway. Consequently, the fabric offers exceptional colour richness and an intriguing expression. From a distance, it has the calm surface of a unicoloured fabric. But, get closer, and shimmering colour nuances, delicate contrasts and an elegant structure emerge.

## Hallingdal 65 | Fabric from Kvadrat

Kvadrat's first textile 'Hallingdal' has become the archetype of woollen textiles. The very durable upholstery fabric was originally designed in 1965 by Nanna Ditzel, and is now available in a version with an updated colour scale: Hallingdal 65. Hallingdal 65 is made of wool and viscose, which complement each other well: the wool provides excellent durability and flexibility, whilst the viscose adds brilliance and depth to the colour. Both materials are dyed before they are spun, which highlights the rich texture of the fabric.

## Maple | Fabric from Kvadrat

Aero-finished and therefore extremely soft to the touch, Pine and Maple are made with three tone-in-tone coloured yarns. The viscose used in their construction gives them a distinctive shimmer, which deepens according to the light and the perspective of the viewer. Pine is flat-woven and has a subtle striated look. Maple is woven with a chenille yarn and has a soft pile that reveals the structure of the weave. Foreign fibres and small clusters of colour may appear on the fabric's surface adding to their slightly irregular, casual expression.

## Moss | Fabric from Kvadrat

The second design by Vincent van Duysen and Anna Vilhelmine Ebbesen is the distinctive upholstery fabric Moss. The mixture of twisted yarn and chenille gives the fabric surface a textured structure with an appearance of movement, and also creates a soft handle which adds a special dimension to the furniture it covers. The twenty-two colourways are either one- or two-tone combinations inspired by Vincent van Duysen's own home and range from cool cement and soft blue to oily green, curry yellow and the shades of natural wood.

## Re-wool | Fabric from Kvadrat

Crafted using 45% recycled wool, Re-wool is a rich upholstery fabric with a sustainable profile. The fabric is partly made by reusing scraps from Kvadrat's yarn spinners in the UK. It is designed by Margrethe Odgaard. 'The idea was to create a both honest and environmentally friendly – fabric with a poetic feel by recycling leftover material from Kvadrat's own production', explains Margrethe Odgaard. Reminiscent of colourful stitchings on a darker background, Re-wool features exceptional depth of colour, creating a dynamic play on the fabric's surface when applied to furniture.

## Remix 3 | Fabric from Kvadrat

Remix 3 is an elegant upholstery textile distinguished by exceptional depth of colour, designed by Giulio Ridolfo. It comes in 23 new hues, adding to an already expansive palette which now offers a total of 72 sophisticated colourways. Remix 3 looks uncoloured from a distance but reveals subtle details and colour contrasts when viewed close-up. The textile features a tight, minimalistic weave, and derives its lively colour play from a combination of two different mélange yarns, which each combine up to three hues. The new colours – carefully selected from 2600 samples – are inspired by an extensive study of traditional Indigo dyeing undertaken by Giulio Ridolfo on his travels. Centred around deep combinations of blues and rich natural reds, they also include subtly coloured neutrals.

A highly-respected certification verifying that it meets their rigorous requirements regarding the environment, use of energy and resources. A special process involving sanding, buffing and applying a special type of leather oil to the surface gives it that almost velvety touch.
